

Top 5 Reasons To Have RocketFailover™

- 1. Automatic Backup Internet Connectivity Using RocketFailover 4G**
 - a. When primary connectivity fails, RocketFailover automatically switches your network traffic over to a backup Internet connection using 4G, so your business stays running.
 - b. Powerful nationwide coverage, available nearly everywhere in the continental U.S.
 - c. Easy to install with Live-In-Five™ setup.
- 2. Isolated, PCI Compliant Solution**
 - a. PCI compliant architecture; if your network isn't segmented for PCI compliance, we make doing that simple.
 - b. Complete with public static external IP address.
- 3. State-of-the-Art, iStatus® Monitoring**
 - a. Know the status of all Internet connections across all of your locations.
 - b. Patent pending iStatus ConnectionValidation™ for backup connections, so that you know your 4G connection is ready and working when needed at any of your locations.
 - c. Simplifies and speeds up the time it takes to resolve connectivity issues, restoring the business to its peak operation.
- 4. Affordable, Predictable Monthly Billing**
 - a. Predictable monthly costs; no more overage charges.
 - b. One easy bill for all of your locations makes RocketFailover hassle free.
- 5. We Handle All The Details So You Can Focus On Your Core Business**
 - a. U.S.-Based technical support that you can trust.
 - b. Full out-of-band remote management.
 - c. Full replacement ForeverWarranty™ for all hardware.
 - d. Automatic security updates and driver updates.

RocketFailover™ Appliance & iStatus® Probe

Additional Benefits Include:
